Information about the projet

The Fablab Silex & Co is a cultural and scientific structure linked with the Maison des Minéraux in Crozon.

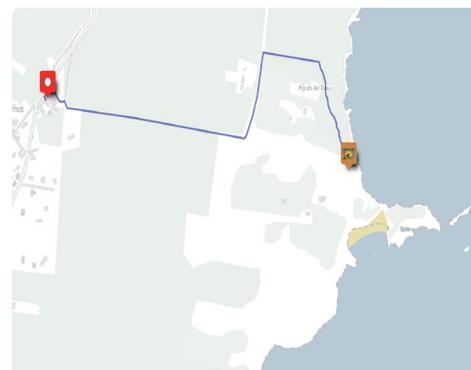

The Ruralab+ project takes place to promote youth participation in rural area with participants from Lithuania, Spain and France.

In this context we created this prototype about local biodiversity.

Mark on the map !

Description

My Breton name is Lann-ki, but scientists call me Ulex Gallii. I'm named after Nicolas Joseph Marie le Gall, the person who discovered me.

I live on the Atlantic coast of Europe. I like sunshine and dry soil.

I produce pretty yellow flowers from July to November.

I'm used to make mattresses for livestock and as firewood. Humans eat me for dessert and drink me as a liqueur.

I am used in medicine as an anti-inflammatory and diuretic. I can also help cure cancer!

According to a Breton legend, the souls of the death remain between my thorns after death.

Who are you ?

My name is _____ ,
I'm ___ yo and I enjoy _____ .

When it comes to nature walks, I am :

- a total newbie
- a curious wanderer
- a nature friend
- a full-on nature nerd
- practically moss

Relation to my environment

Look at my neighbors, who are they ? You can look down on the map or use the app "plantnet" to help you.

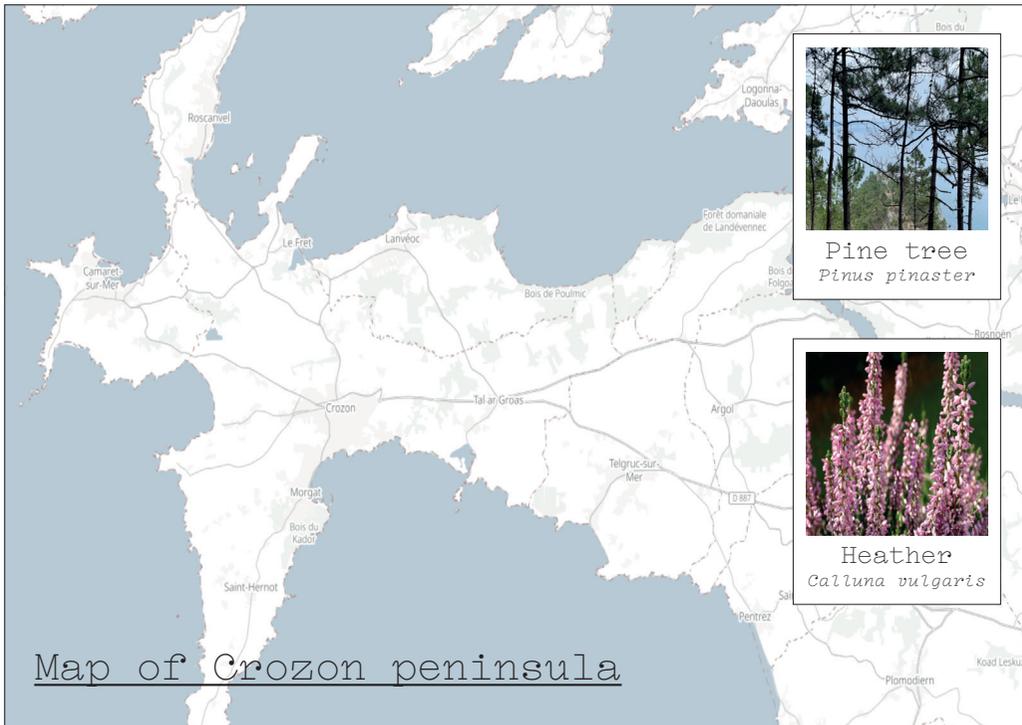

- Pine tree
- Heather
- _____
- _____
- _____
- _____

Do I take a lot of space in the environment ?

If you are me (the plant), what do you want to say ?
You can make jokes, be poetic, create a song, write, draw, create a comic,...
